

NOXEM GROUP — Supplier request

Thursday 8 October 2026 · Flat glass, full containers · 4 files — all answers needed by Friday 9 October

Ramon, four files below. Three are open and waiting on you; the fourth is new. **I need all four answered tomorrow, Friday 9 October.** Where a full price is not possible by then, a feasibility yes or no is already enough for me to move.

1. CANADA — revised pricing, change of format

ANSWER NEEDED FRIDAY

The offer we sent has come back: **the price is too high**, and the buyer is asking us to re-quote on a different format.

He now wants **standard jumbo 3210 × 2550 mm** instead of the cut size we quoted, on the understanding that the factory standard format should price better. Same nine references, same destination, same full-container basis as the previous offer.

What I need:

- Your best price per m², **EXW, on jumbo 3210 × 2550**, for the nine references of the previous offer.
- Tell me plainly **how much the jumbo saves against the cut size** — that figure is the whole argument I have to win this back.
- This is a repeat buyer in a market with no domestic float production. **Please price it as such.**

2. NAMIBIA — still waiting on your answer

ANSWER NEEDED FRIDAY

This enquiry has been open with you since **28 September — eleven days**. You were going to check with your management whether a workable origin could be found. **I need that answer tomorrow.**

Any origin is acceptable to me — Malaysia or otherwise. What I cannot do is keep a confirmed enquiry waiting with no answer at all.

Reference	Size (mm)	Basis
Clear float 4 mm	1830 × 2440	one 20' per product
Clear laminated 6.38	2440 × 2000	one 20' per product
Tinted grey laminated 6.38	2440 × 2000	one 20' per product
Translucent white laminated 6.38	2440 × 2000	one 20' per product

Four 20' containers, **approximately 6,100 to 6,600 m² in total**, CIF with freight shown on a separate line. Sizes and quantities are confirmed in writing by the buyer; **only the price is missing.**

3. MARTINIQUE — production and shipping confirmation

CONFIRM FRIDAY

Three short confirmations, nothing more:

- Is the order **actually in production** right now?
- Can you confirm it **still ships on the 26th**, as agreed?
- If possible, **a short video of the production line** — it carries a great deal of weight with a customer who is waiting.

4. TRINIDAD & TOBAGO — new enquiry

QUOTE NEEDED FRIDAY

Destination port	Port of Spain, Trinidad and Tobago
------------------	------------------------------------

Container	20' open top , specifically requested
Volume	33 cases — roughly 4 containers at 10 cases each
Frequency	Every 2 to 3 months — 4 to 6 shipments per year

Six references, three sizes, cut to size:

#	Product	Size (mm)	Cases
1	Dark grey tinted float 4 mm	1219 × 2438	5
2	Dark grey tinted float 4 mm	1829 × 2438	5
3	Clear laminated 6 mm	2438 × 1829	6
4	Clear laminated 6 mm	3302 × 2261	5
5	Mirror 6 mm	2438 × 1829	6
6	Clear float 6 mm	2438 × 1829	6
	Total		33

What I need back:

- **Your price per m², EXW, for each of the six references.**
- **Can you make reference 4, 3302 × 2261 in laminated?** This is the only real unknown in the file — the width sits inside the ribbon, so the question is whether your autoclave takes that size. A yes or no is enough.
- **Packing, as the buyer has asked for it:** number of sheets and gross weight per case, **ISPM-15 treated timber cases**, and **paper interleaved** — he asked that last point specifically.
- **Production lead time and delivery lead time.**

In short: file 1 a jumbo price and the saving against cut size · file 2 the answer you owe me since 28 September · file 3 three confirmations and a video · file 4 six prices and one yes or no on the 3302 × 2261. **All of it on Friday 9 October.**
